Orchid Project receives 50.000 Danish kroner from The Mary Foundation

Orchid Project, founded by Julia Lalla-Maharajh, has just received 50.000 Danish kroner from The Mary Foundation.

Orchid Project has a vision of a world free from female genital cutting, and aspires to make a significant impact on the reduction on female genital cutting (FGC) by 2025. Orchid Project does this by working with other organisations which are delivering an end to FGC at the grassroots, communicating the hope for an end to FGC to the wider world and undertaking advocacy at the highest level to bring increased resource to the issue.

With this donation The Mary Foundation wishes to support Orchid Project's work to raise awareness, advocate for more resources globally and ensure action.

This grant to Orchid Project is a part of The Mary Foundation's yearly donation to selected projects or organisations.
